

ATTORNEY DOCKET NO. 2799CIP

CLAIMS

If entered, this listing of claims will replace all prior versions, and listings, of claims in the application:

Claims 1-21 (cancelled).

22. (currently amended): An internet-based system for ordering freight services from any internet connected computer comprising a server computer system which includes:

(i) a server computer system, said server computer system providing one or more pages which, when viewed on, any internet connected computer allows a user to enter a freight delivery service request including at least source and destination zip codes, class, weight and accessorial services;

(ii) said server computer system further providing one or more pages which, when viewed on any internet connected computer, allow a user to schedule a shipment including at least a shipping and receiving address, a ready date, invoice information and member discount information; and

(iii) said server computer system further providing one or more pages which, when viewed on any internet connected computer, permit a user to review status of shipments made by the user;

(iv) said server computer system further providing one or more pages which, when viewed on any internet connected computer, permit a user to obtain actual quotes for shipping from a plurality of carriers;

ATTORNEY DOCKET NO. 2799CIP

(v) said server computer system further including storage for a database of accessorial services offered in conjunction with a freight shipment process, said freight shipment process including quoting, ordering and completing said shipment; and

(vi) said server computer system further providing a web site with a plurality of web pages, one or more of said web pages sequentially displaying a plurality of accessorial services and requiring the user to address each of said accessorial services offered to accept or decline each of said accessorial services before completing said freight ordering services, thereby providing information about accepted or declined accessorial information within the freight shipment process to provide an accurate quote.

23. (previously presented) The internet-based system of claim 22 where the server computer system further comprises one or more pages which, when viewed on a user computer system, allow the printing of a bill of lading.

24. (previously presented) The internet-based system of claim 22 where the server computer system further comprises one or more pages which, when viewed on any internet connected computer, permit the user to create an invoice to send to another party.

Claims 25 through 43 (cancelled).
